Problem 1. Protecting Host Systems

1. On your virtual machine server, click the **Start** button, enter services, and launch the Services desktop app.

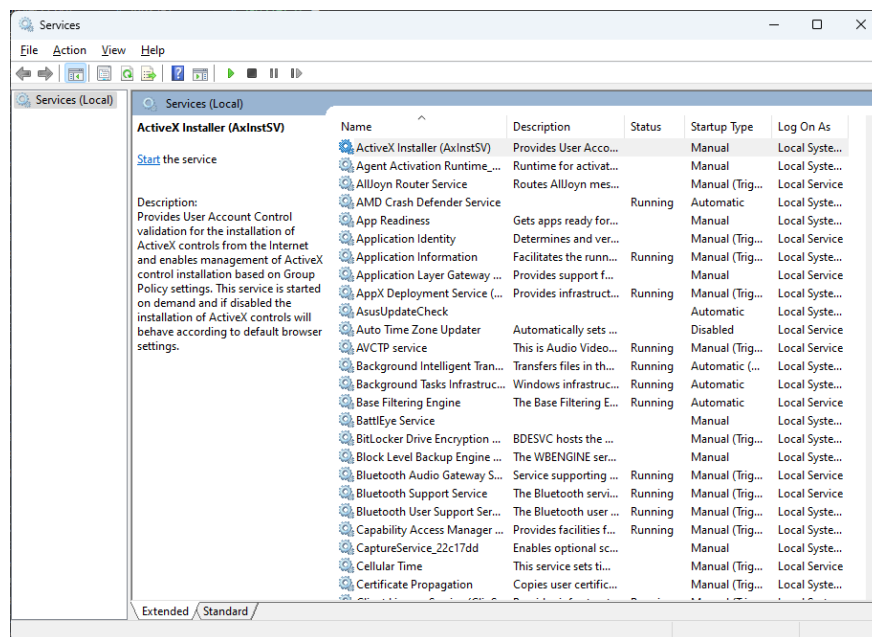

Figure 1: Services screen

- Practice sorting the columns by clicking each heading so you can view the services appropriately. Create and save two screenshots, each showing a differently sorted view.

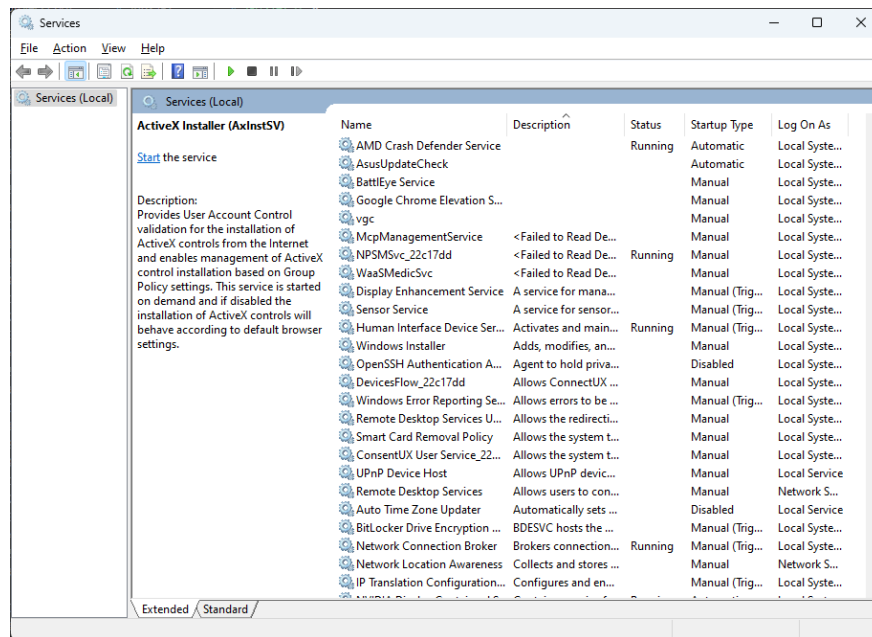

Figure 2: Services screen sorted by Description

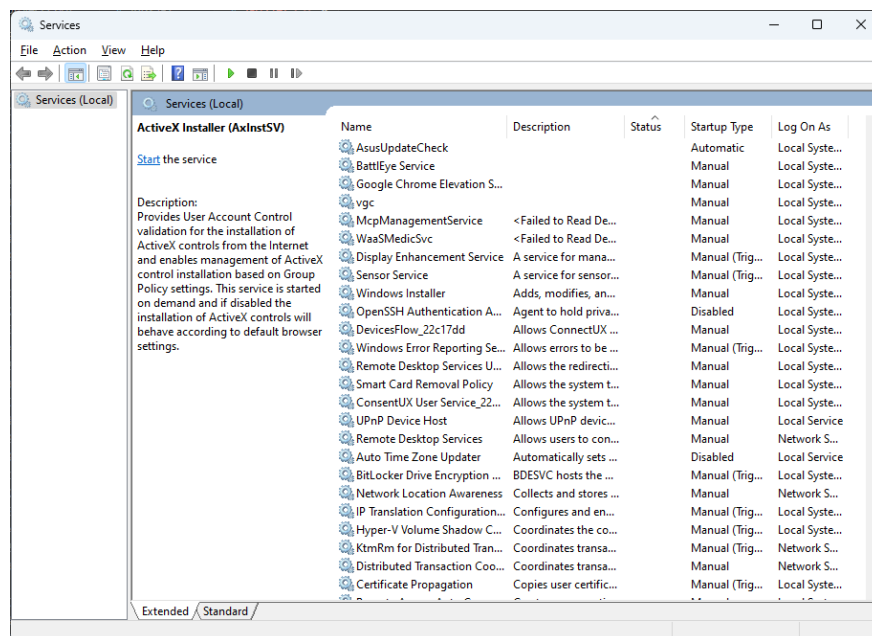

Figure 3: Services screen sorted by Status

3. Display the properties for the Task Scheduler service by double-clicking the service. What other programs would not run if this service is terminated?

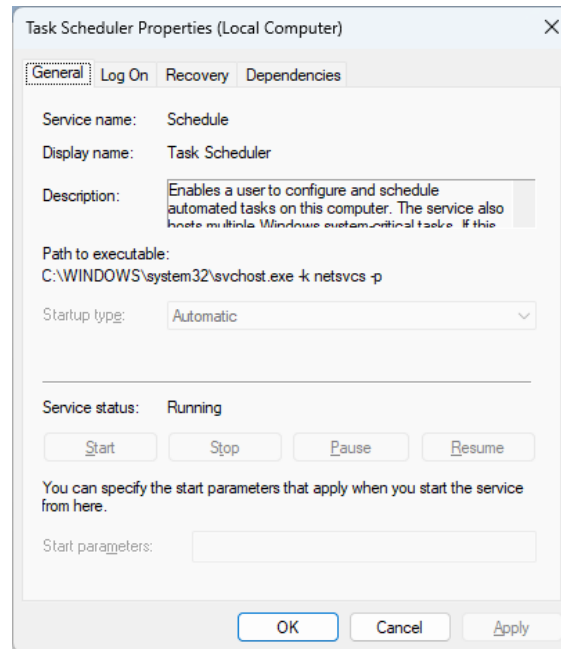

Figure 4: Task Scheduler General properties

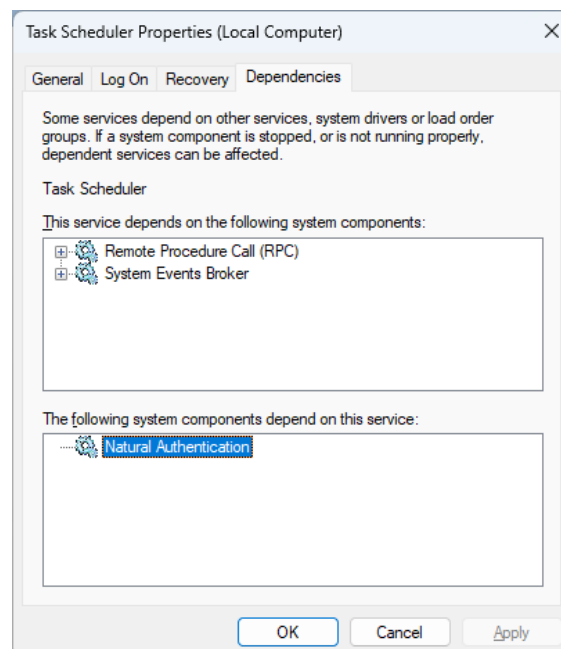

Figure 5: Task Scheduler Dependencies properties

Looks like the Natural Authentication service would not run if this service is terminated.

4. What is the status of the Fax service?

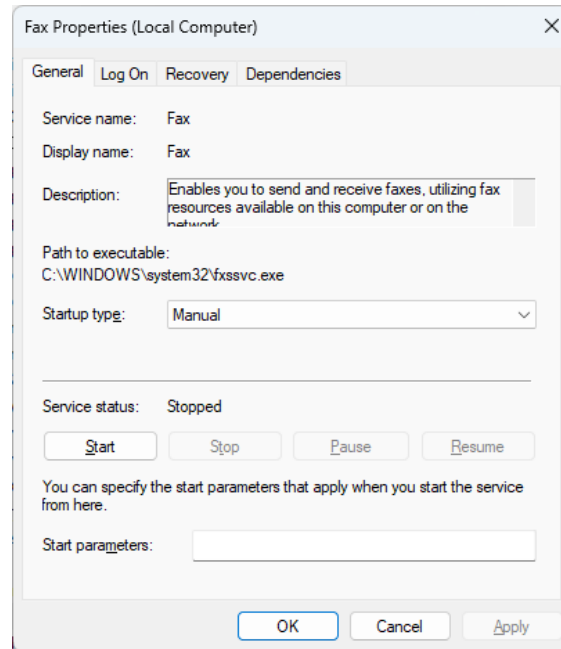

Figure 6: Fax General properties

The Fax service status is Stopped.

5. In the properties for the Fax service, change the **Second failure:** setting to **Restart the Computer**. Create and save a screenshot of this setting.
